

Dear Laheng,

They say a teacher gets the most reward in Paradise. I came into this class wanting to somewhat expand my knowledge and you exceeded any expectations. You struggle very hard on your own time to help us understand our religion, not only are you graduating us, but leaving us as devote Momin Muslims to go and educate the rest of the world. You know how to appeal to everyone which is what I appreciate about you, you understand that children get bored easily so you amend your teachings and add humor, making it easy for us to grasp and love our religion. Honestly, due to your teachings I read Quran and pray not because I have to or am forced to but because your words, lectures, teaching and humor helped open my heart and changed my personality. Besides our education on Islam, you have organized field trips for us to converse with Christians and Jews trying to get us to respect all people no matter our differences. I feel like you see past peoples faiths and respect for everyone but rather you be everyone depending on their punitives. You understand us as a teacher but I think of you as another parent. You're trying to make us better people to change the world of this corrupt time. You believe in us repeatedly, and see the good in all of us, no matter background. You taught us to be modest and I can see you have changed us, made our personalities better, thank you. Although we annoy you sometimes you always give us chances because we're all pure and on our path to become better Muslims thanks to you.

Sincerely,
Amrrow Hussain
